Description

For combination with a KESSEL shell kit for creating a Duo lifting station for wastewater without sewage with an SPZ1000 wastewater pump. The ready to plug in lifting station for wastewater without sewage is equipped with a submersible pump and a backflow preventer. The collection tank made of permanently resistant polymer (PE) has an open pump tank. Onehanded closures enable easy removal of the integrated components. The system for installation in the floor slab is pre-assembled for final installation on site. The station is controlled by a user-friendly control unit, which is optionally integrated in the building management system using a potential-free contact or alarm and collective fault messages that can be output through a GSM interface. KESSEL technology kit consisting of:

- Pumps with macerator and multi-vane vortex impeller for maximum operating safety - Comfort control unit 230 V - Optical alarm probe - Pneumatic level measurement
